Selectors and Step Feed

- Advantages and disadvantages of using
- Evaluating performance

Microscopic Evaluation of Activated Sludge

- Floc Formation
- Protozoa Identification
- Filament Identification Techniques

Operating Secondary Clarifiers

- Controlling blankets and inventory
- Clarifier State Point Analysis

Developing Troubleshooting Charts

- High Sludge Blankets
- High SVI
- High Effluent TSS

Question & Answers, Discussion of Problems

PRESENTER:

Rick Marshall specializes in start-up, optimizing, and troubleshooting of wastewater and water treatment facilities, along with work in producing O & M manuals, troubleshooting guides, SOPs and other technical documents. He has over 35 years of experience in industrial (Pulp & Paper, various types of food processing, chemical, refinery) and municipal treatment systems. He has dealt with a variety of operating problems ranging from sludge settling problems, floc formation problems, biomass toxicity, effluent toxicity, foaming and floating sludge problems.
